Forecast for Saturday 08 May 2021

Weather: Soon after midnight winds will strengthen and an area of persistent rain and low cloud will arrive from the south-west. This will bring extensive cloud and heavy rain with very poor visibilities through the day across the whole region and a risk of gales on hill tops.

Chance of cloud free mountain/hill tops above 600m: Less than 10%

Visibility: Very poor through the day with cloud bases of 300-500m and persistent heavy rain, in the north east visibilities will be slightly improved with cloud bases 500-700m.
